## Company Purpose

Make Possible **Convenient & Sustainable** Car-wash Service

Eco-Friendly  
Device

Anywhere & Anytime  
Service

Digitalized  
Network

# Problem

*What problems are we facing?*

## Society

High water consumption and secondary pollution have become global problems of Car Wash industry

**High Water Consumption** traditional car-washing service consumes 100 litres each time, with over 2 billion registered vehicles globally, annual water consumption is enormous.

**Secondary Pollution**, various chemical cleaners and dry cleaning agents are used to wipe the exterior car body, so that a large amount of wastewater mixed with chemical substances flows into the ground, pollutes water resources and damages air quality.

# Problem

*What problems are we facing?*

User End (Car Owner)

**Convenience**, especially in metropolitans, commuting to get car wash service takes time, you may encounter:

1. Too tired to get a car wash service;
2. Too busy to drive to get a car wash service;
3. Rush hour traffic on the way makes difficulties;
4. Rush hour queue for a car wash service;
5. Urgent need to get a service for an important meeting.

# Problem

*What problems are we facing?*

Supplier End (car wash shop)

**Immovable Service**, the traditional car washing method (high pressure water gun) and value-added service providing determines that users have to spend time for commuting for a car wash service;

**Pollution**, a lot of water wasted and creates secondary pollutions, is a main factor prohibits car wash service in shopping mall, residential areas, and major public areas, etc;

**Capital**, is a barrier for many car-wash service supplier to start, such as rent, machine cost, etc.

# Solution: E-Karwash

A **Web Platform** where **USERS** can expect to receive a car wash service

Anywhere & Anytime

People now can order to have to-door service with the most advanced digitized steam tech car-wash machine - Besteam Car Washer

Water-saving with **NO**  
secondary pollution

Besteam Car Washer consumes **ONLY 1 liter** of water to complete the service without polluted waste water to the ground

# Solution: E-Karwash

A Web Platform where SUPPLIERS can expect to get

## More Money

Providing service anytime & anywhere may unleash the potential demand for car-wash service, and thus provide more business/income for the supplier

## More Efficient

Having a nearby order from E-Karwash platform enables the supplier to have more business from to-door service

## More Service

Cooperating with platform and get a machine enable a supplier to provide more value-added service like engine bay cleaning and inside sterilization

# Why NOW

## Revolutionary Technology by New Watt

### “Besteam” Digitalized Steam Car Washer

People have been working for decades, or even centuries to clean cars with less water consumption and at best possible convenience, however, due to “technical obstacle”, without satisfactory success...

### Integrated Multi-Function Car-washer

Only until recently, a revolutionary technology invented by New Watt has become and launched its first product, Besteam Car Washer, fully digitalized equipped movable storage battery, makes it possible that people can now receive car wash service from home...

# Why NOW

## Revolutionary Steam Technology by New Watt

- Use the algorithm to accurately control the water flow, water frequency and temperature through microprocessor-based with programmed integral application chips.
- Relying on the self-developed patented steam generator, it can generate continuous, stable and adaptive pure steams that can be adjusted to various environmental conditions.
- Technology patented with global-wise protection

# Why NOW

## Integrated Multi-Function Car-washer

Equipped with self-owned patented steam technology, the Besteam car-washer enables:

- a). **Multi-Function** - Digitally Controlled Steam Generation
- b). **Mobile** - Movable Device with Battery Integration
- c). **Safe** - Steam Generation without Boiler, No Explosion Hazard
- d). **Eco-Friendly** - 1 Bottle Clean a Car with No Secondary Pollution
- e). **Fully Clean** - Engine Bay Cleaning, Inside Sterilization, Outside Cleaning, Interior Cleaning, Tire and Wheel Hub Cleaning, etc...

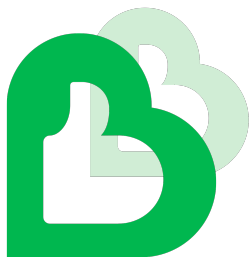

## Solution

Product: Besteam Car Washer

# Mobile Digitalized Steam-tech Car-wash Machine

## Solution

Product: Besteam Car Washer

# 1

Instant Steam Generation Technology

## Bottle to Get a Car Clean

without secondary polluted water

## Water-Saving

With Instant Steam Generation Technology, the Besteam car-washer need only one bottle (1 litre) of water to clean your car.

Traditional car-wash consumes 100 litres or more per car wash, therefore, adopting Besteam car-wash service will save huge amount of water worldwide.

## Solution

Product: Besteam Car Washer

# 1

Instant Steam Generation Technology

## Bottle to Get a Car Clean

without secondary polluted water

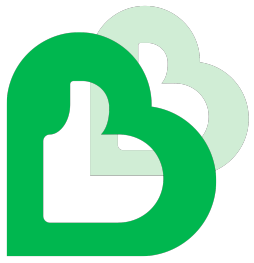

## Eco-Friendly

Patented technology by Atomized chemical cleaners to work with steam, easily removes the dirt without scratches. While traditional car wash is wasting a lot of water and creating secondary pollution on the ground, Besteam brings zero secondary pollution to the ground.

Patented self-owned zero-acid emulsifier combined with steam, double-hole nozzle, high temperature removes stubborn stains, instantly removes stains without leaving marks.

## Solution

Product: Besteam Car Washer

# 1

Instant Steam Generation Technology

## Bottle to Get a Car Clean

without secondary polluted water

### Mobile

Equiped with battery, the machine is able to provide door-to-door service both outdoor and indoor

### Safe

Instant Steam Generation Technology realizes non-boiler steam generation, which is safer to be mobile

### Low Energy Consumption

Save water, instant heat up and high-efficiency, continuous & stable steam output

# Solution

Product: Besteam Car Washer

## Multi-Function

the machine integrates dust elimination, exterior cleaning, interior cleaning, engine cleaning, sterilization functions into one to provide value-added service.

Exterior Cleaning

Interior Cleaning

Sterilization

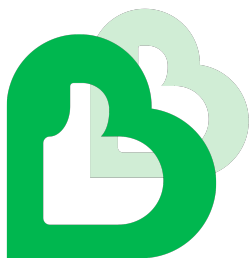

Engine Cleaning
